

# Service Guide

How can we help you? Use our handy guide to determine what service would suit your project.

Don't see your antibody project? Then **LET'S CHAT** to see if a custom project is right for you.

# Antibody sequencing & discovery is all we do!

In 2009, inspired by a shared vision within UCSD's Computer Science department, a group of professors teamed up. That spark led to the founding of Abterra Bio in the heart of San Diego. We're all about reimagining antibody sequencing and discovery, and that's all we do!

## Valens

- World's first commercial antibody protein sequencing service!
- Over a decade of technology development and expertise.

## Reptor

- Over 11,000 hybridomas sequenced!
- Utilizes next generation sequencing (NGS) for high-throughput and comprehensive sequencing.

## Alicanto

- Over one hundred projects completed and 2500 antibodies delivered!
- IP free, you are the owner of the sequences.

All work  
performed in  
the USA!

Celebrating  
Over 10 Years Of  
Sequencing!
